It's safe and secure

**ULSTER
FARMERS'
UNION**

working in partnership with
Ulster Farmers' Union

Livestock is farmers, most valuable asset - and also the most vulnerable to thieves.

Remote managed real time CCTV offers protection and peace of mind

Trailers and horse boxes are often left in unsecured or remote locations. Consequently they are targeted by thieves.

CCTV and Monitoring solutions protect these key assets.

During lambing season, the need to protect new arrivals places immense pressure on farmers.

Real time remotely monitored CCTV solution saves numerous visits throughout the night

We can offer you cost effective technical solutions for your farm and adjoining areas from remotely managed real time CCTV day and night, diesel tank alarms, number plate recognition, the opening and closing of farm gates by remote means, monitoring temperature, intruder alarms, fire, water and gas. We can monitor your out buildings that may contain your valuable assets from farm machinery to tools and livestock. We also can offer you wireless solutions for external fencing that we will monitor 24/7 x 365 sending us an alarm when intrusion occurs!

We are not installers but can recommend a list of approved CCTV & alarm installers in your area.
